Dentech ECO-19 Chair

The patient chair is key to providing comfort for the patient and unabated access to the oral cavity for the dental team. The Dentech Advance ECO-19 Chair offers the ultimate blend of features for both patient comfort and professional convenience.

The Dentech ECO-19 Chair Provides the Ultimate in Patient Comfort and Professional Convenience

Unabated access to the oral cavity is probably the single most important factor in performing high-quality dentistry. Getting this access while maintaining proper ergonomic position allows practitioners to provide good dental care without putting themselves at risk for musculoskeletal injuries.

Squirm-Free Comfort for the Patient

Supportive foam cushions provide just the right balance between firm support and soft cushioning to assure patients remain comfortable and still throughout the procedure. A compensating, contoured seat/back offers additional flexibility and comfort. Movable, removable left and right armrests provide ease of access and flexibility. An adjustable magnetic headrest pillow supports the patient's head. The pillow can be moved down to accommodate smaller patients.

Unabated Access to the Oral Cavity for the Dental Team

The easily adjusted headrest allows precise positioning of the oral cavity. The thin and narrow back gives the dental team unabated access while maintaining proper ergonomic postures. Even clinicians of small stature find it easy to get their legs under the back of the ECO-19 chair due to its remarkably thin profile. The foot control can be programmed for three working positions plus exit. The last-used position is held in memory and can be repeated.

High-Quality Construction

The ECO-19 features an easy-to-clean exterior with no painted parts and no plastic components to crack or break. All surfaces are long-lasting, wear-resistant, and designed to allow high standards of asepsis. An interior junction box allows for clean installations. Chair operation is smooth, quiet, and easy to control. A security stop on the backrest assures the chair motion stops (and retreats slightly) upon contacting an obstruction. Swivel movement with lock maintains position. Chair motions are smooth and rock-steady.

Options

- Double-articulating headrest for precise positioning of patient's head
- Chair-mounted delivery units
- Pivoting "surround" units for left/right flexibility
- Rear-mounted pivoting assistant package, hygiene package, or cuspidor

The Dentech ECO-19 Chair is backed by Dentech's legendary service and a five-year warranty. Dentech Equipment has a 35-year track record of providing high-quality dental products. Its goal is to provide dental professionals with products that increase productivity and reduce risk of injury through sound ergonomic design.

Dentech reserves the right to change specifications and make any technical alterations without notice.
