Dentech Advance Stools

When dental professionals are comfortable and ergonomically positioned, the result is better dentistry and increased productivity. Dentech Advance stools offer the ultimate combination of comfort, adjustability, and ergonomic design.

DENTECHEQUIPMENT

Dentech AdvanceStools Are Designed to Position the Entire Dental Team for Maximum Comfort and Flexibility.

Good looks and functionality are a start, but solid ergonomic design is essential for promoting the good posture, comfortable seating, and correct positioning that results in increased productivity. Dentech stools are designed, not just to give dental professionals a place to sit, but to support the body, allow proper blood circulation in the legs, avoid pressure points, and reduce fatigue.

The Advance Operator's Stool

The Advance Operator's Stool features a contoured, seamless seat pan that relieves pressure points in the backs of the thighs. Dual controls allow proper adjustment of seat height, tilt, and lumbar support. Seat height can be adjusted down to 13 inches to accommodate clinicians of smaller stature. An elliptical seatback provides maximum lumbar support to minimize back strain.

The Advance Assistant's Stool

The unique body support mechanism on the Advance Assistant's Stool ensures proper positioning to access the oral cavity without putting strain on the back or neck. The contoured, seamless seat pan relieves pressure points in the backs of the thighs. Seat height, footring, tilt, and lumbar support are adjustable through easy-to-use controls. The elliptical seatback provides lumbar support to minimize back strain.

The Advance ErgoTilt™ Stool

This state-of-the-art stool offers the same ease of adjustment as the Advance Assistant's Stool and features a unique mechanism that places the assistant in perfect ergonomic position. The assistant simply swivels the body support into place and the seat pan automatically tilts to the correct angle to enable the assistant to access the oral cavity without having to lean or place pressure on the inside leg. The ErgoTilt stool also features a contoured, seamless seat pan and the body support doubles as a lumbar support for proper, relaxed posture, whether sitting upright or leaning toward the patient's oral cavity.

Easy-to-use controls adjust seat height and tilt to accommodate a wide variation of body sizes.

The seat pan on the ErgoTilt stool automatically tilts when the assistant moves the body support into place, putting the assistant in correct position to access the oral cavity.

The Dentech Advance Stools are available in a variety of attractive colors.

Dentech Stools are backed by Dentech's legendary service and a five-year warranty. Dentech Equipment has a 35-year track record of providing high-quality dental products. Its goal is to provide dental professionals with products that increase productivity and reduce risk of injury through sound ergonomic design.

Dentech reserves the right to change specifications and make any technical alterations without notice.
